Politicians Surprised by News That President Has Had For mer Princeton Economist in the Islands Since Last December

U. S. POLICY AT STAKE The damage done was mainly structural. DETA!LS

Chief Executive Awaits Report Before Deciding on Question of INITIAL YEAR Whether to Set Aliens Free or Continue Their Education

WASHINGTON - Politicians of all parties received another surprise from President Wilson today when they learned that the President has had Prof. Henry James Ford of Princeton University in the Philippines since last De-

Pressure of various kinds has been brought to bear in regard to the archipelago ever since inauguration if not before. The army has offered one line of argument. American business men in the islands have come forward with another. The minority of educated Filipinoes contributed a third point of view. But none of them has received any expression of opinion from Mr. Wilson. Today it was learned that he is waiting for Professor Ford to report, and that the professor is still in the islands gathering material for the analysis he is to submit to the President.

Professor Ford holds the chair of political economy at Princeton and is regarded so highly by President Wilson that those who know of their relations expect the President to guide himself largely by the results of the professor's Theoretically, the President be lieves that a republic is out of its sphere when it controls alien peoples.

But the practical question before him is whether he will do more by the Philip pines by setting them free than by hold ing them until the system of public \*chools now in operation there has brought understanding of the principles of self-government to all the people of

# **DEFENSE PLAN IN** RENT BY BOMB DYNAMITE CASES IS REVEALED Early Morning Attack by Suf-INDICATED TODAY

Attorney Coakley in Cross-Examination of John J. Breen Shows Purpose of Trying to Make Mr. Pitman Responsible

REVIEWED

That I'mest W. Pitman, the mill constructor, who killed himself rather than tell the grand jury what he knew of the planting of dynamite during the Law-IS COMPLETED rence strike, may have been the moving spirit in any conspiracy that existed, but that William M. Wool and Frederick E. Atteaux had no knowledge of it whatever. will be the main line of the defense in the conspiracy trial now in progress.

This was made evident today during the cross-examination of John J. Breen. the Lawrence man who, aided by Dennis J. Collins, actually planted the explosive. Breen was under a searching cross-examination by Daniel H. Coakley, attorney for Mr. Atteaux, for hours.

He was led back and forth along the trail of the entire story which he related on his direct examination, but generally stuck to the main points.

The Pitman connection was indicated by a lengthy series of questions when Mr. Coakley, in establishing that Mr. Breen had demanded that Mr. Atteaux loan him \$13,000 to settle damage suits for false arrest by the victims of the dynamite planting asked Mr. Breen whether he had not told certain lawvers that Mr. Atteaux should loan the money. because Mr. Pitman had told him the whole story.'

versation ever took place so far as he could remember. Mr. Coakley also tried to get from Mr.

### HIGHEST COURT **RULES BOAT TAX** IS COLLECTABLE

The full bench of the supreme court today, held in the suit of John A. Tobey, REVERE'S PROBLEM tax collector of Falmouth, against Elbert S. Kip of Morristown, N. H., that sail boat kept at a town in this state even though owned by one domiciled in another state, may be taxed here as personal property.

In the superior court Judge Dubuque ruled that the collector could not collect the tax of \$20.40 that he imposed on the defendant's boat for 1910.

The court holds that the tax was pro perly assessed and collectable, if the boat was merchandise as the statute provides that merchaddise, machinery and animals owned by persons not in habitants of this state or owned by to the owners in a city or town where the property is located.

The court holds a boat is properly

(Special to the Monitor)

grounds, is modern, having been built in 1898 with the surplus left from the East End exhibition. An additional of September.

There are in Scotland about 10,000 vathe flowers most. Perhaps it is the children, whose opportunity of seeing country sights is limited to a few days "doon the water" at Glasgow fair in July, when many of the wild flowers are past. The first show opens with 160 specimens, ranging from common daisy, dog violet, primrose and windflower or anemone to he rare setterwort. Each has a plainly opular name of the plant.

Some of the flowers seem to suit their name to perfection, like Sweet Cicely, the graceful fritillary, the quaint "wee on clock," with its four faces, spring beauty, the lesser celandine, sung by Wordsworth, lady's smock, golden saxifrage, wood sorrel and purple orchis, be-

Some are none too graciously named pion. Some are "weeds" to the gardener dandelion, colt's foot, dog mercury, and garlic, beautiful as its pure white flowers are. Others to be seen are the blue squills or scilla, yellow globe flowers, orange marsh mallows, pink herb Robert,

white wood stitchwort and wild hyacinth, which many think to be the true "blue bells of Scotland." Behind the flowers are bigger jars with sions. erab apple, plum, and pear blossom, bar-

berry and all sorts of budding shrubs and trees. Among the ferns, polypody is well out, while the brackens are still tightly curled. The flowers come from all sorts of places. These are chiefly from Culzean

castle in Ayrshire, and Gatchouse-of-Fleet in Kirkcudbrightshire. Some come from Auchencairn moss, Giffnock quarries and Rouken glen. Every Monday many are brought in from the Saturday rambles of the Andersonian Association, a botanical club.

# FRANCE WINS BY DECISION OF HAGUE COURT

Italy Adjudged Wrong in Seizure of Carthage and Manouba. Steamers Captured During Tripoli Conflict With Turkey

### COMPENSATION FIXED

(Special to the Monitor)

AMSTERDAM, Holland-The decision of the Franco-Italian arbitration court with regard to the seizure of the French liner Carthage and the Manouba, during the Turko-Italian war has been given in favor of France. The case of the Tavignano is to be settled between the two governments direct.

The compensation which the court has ordered Italy to pay amounts to 160,000 francs for the seizure of the Carthage. Of this sum 75,000 francs is to go to the owners of the vessel, the Compagnie Generale Transatlantique; 25,000 francs to the airman Duval, and 60,000 francs to the passengers and the owners of the freight. The compensation for the Manouba amounts to 4000 francs.

The circumstances attending the capture of the Carthage and the Manoubs were briefly these: On Jan. 16, 1912, the Carthage was seized by the Italian naval authorities when on her way from Marseilles to Tunis, as a suspect, for having on board an aeroplane belonging to M. Duval, as well as parts of another machine destined to take part in an aviation meeting to be held in Tunis.

It was only after representations had been made by the French embassy in Rome, by order of M. Poincaire, who was then premier, and after a lapse of several days had occurred, that M. Duval's aeroplane was released; the Carthage having meanwhile been allowed to resume her

On Jan. 19, 1912, the Manouba, the regular mail boat between Marseilles and Tunis, was seized by the Italian government and taken to Cagliari. The reason for this action was that 29 Turks were on board who, according to the Italian authorities, were carrying arms and ammunition to Tripoli, but who in reality formed part of a Red Crescent mission.

This incident caused considerable excitement in the press of both France and Italy and was the subject of an important speech in the chamber by M. Point On Jan. 26 it was arranged that both the incidents of the Manouba and the Carthage should be settled by arbitration, and a few days later the Turks were handed back to the French authori-

# ARGUMENT TURNED BY JOHN BURNS

(Special to the Monitor)

MANCHESTER, Eng.-In a speech delivered at the Free Trade hall recently the trend of events is in this direction, and which was devoted almost entirely They will also render the superfluity of to the subject of free trade. John Burns will always remain a risky business. It Montenegro very obvious. Both Austria- said that one of the arguments favored by the protectionists against free trade was that it had made Britain inferior to protected countries, and that that could be proved by the extent to which for taking the Lovcen, which dominates people were emigrating to the colonies The answer to that, Mr. Burns said

> was that emigration was always greatest when trade was good, wages high, and labor in demand. The emigration in Great Britain was not due to economic misery, but to increased education, to enterprise and to imagination. Free trade had enabled 4000 millions of money to be made out of the rest of the world and invested in foreign countries, and it vielded 200 millions a year. Men followed British capital to the colonies and to new countries, and got higher remuneration than they would get at home. When a reason is looked for at home to explain emigration it was found in the desire which men felt for land. Emigration from Scotland had reached

> a record in the past two years, but the reason was not that the Scottish workman could not get employment but because the younger sons of farmers and craftsmen, who did not wish to displace their fathers and elder brothers, went to Canada and Australia to settle on the land before it was taken up by people of other nationalities.

# Breen Cross-Examined by Attorney Coakley in Dynamite Case

(Continued from page one)

H. Rice, a quarryman of Quincy. He is the original plot. the man who accompanied Pitman to Conversation Rehearsed the meeting with Breen and Collins and is the individual who, according to Breen, told him that there was no danger of an explosion, as the dynamite furnished was "frozen solid."

The prosecution hoped that through night." Rice it could connect up the Breen story that Atteaux brought Pitman into the case to purchase the dynamite and that he (Pitman) went to Rice to aid him in furnishing the explosive. After the interview with his witness, District Attorney Pelletier said Rice would be a "most important witness."

Mr. Coakley finally, annoyed at the non-responsiveness of the witness, demanded whether Breen was not answering "I don't remember," because he had been told such an answer was safe, and that he did?" It would be impossible to prosecute for perjury on such answers.

'I answer that way," said Breen, "be cause it is the truth."

Mr. Coakley asked Breen if he under stood that before a judicial body, like the grand jury, he gave one answer and then gave a diametrically opposite answer here he could be prosecuted for perjury, but that if he evaded by saying "I don't remember" he could not be prosecuted.

Mr. Pelletier objected, saying that a layman could not be expected to give an to Atteaux for aid when arrested. answer to an involved question of law. The court ruled that Breen could give his "understanding" of the question. Breen \$500 fine instead of to your mother?" answered that he understood that "I don't remember" was safe.

### Police Help Denied

Mr. Coakley demanded of Breen whether he had not actually planted the dynamite because he wanted to aid Officer Woodcock of the Lawrence police in getting a plain clothes detail. Breen denied this and again insisted that he did it for Mr. Atteaux and no one else. He admitted that he had been able to get Officer Woodcock a plain clothes detail during the strike.

Business Men Will Be Appealed to by Peace Worker Opening Campaign — International Friendship Is Commerce Basis

### CONDITIONS STUDIED

Norman Angell, otherwise Ralph Norman Angell Lane, famed as the author of "The Great Illusion," has reached Boston, where he is to begin a campaign of enlightenment, principally among the business interests, as to the importance of cultivating such international friendhips, politically as tend to make for increased international intercourse commercially.

In his book against war, written from a som what materialistic standpoint, Mr. Angell hits at what he considers the malignant forces that encourage strife. de also makes it very plain that even if one nation succeeds in conquering another, the victor suffers no less from this apparent victory than does the vanquished because international finance and

# CREPE DE CHINE AND BROCADE PICNIC COOKING

Skirt accordion plaited by machine

COMBINATIONS of plain and brocaded materials are extremely smart this spring and they are always beautiful. This gown shows plain crepe de chine combined with brocaded satin, and the result is both handsome and smart. The gown is distinctive in effect and even elaborate, but it is simple to make in spite of that effect.

The blouse consists of a bolero-like portion with a full center portion. There is a pretty fancy collar and the long onepiece sleeves are joined to the blouse at the long shoulder line.

The skirt is in one piece and is slightly circular. It is accordion plaited by machine, so that the making means almost no labor.

Any material that is soft enough to be plaited can be used for the skirt and the center portion of the blouse with any other material that makes a pretty contrast for the waist or the same material in contrasting color. This waist and skirt are admirably well suited to each other, but either can be used without the other.

For the medium size, the waist will require 3 yards of material 27, 23/8 yards 36 or 134 vards 44 inches wide, with 5/4 yard 36 or 44 inches wide for the center portion, 3/8 yard 27 for the fancy collar; the skirt will require 634 yards 27 or 5

yards 36 or 44 inches wide. The pattern of the blouse (7726) is cut in sizes from 34 to 40 inches bust measare; of the skirt (7669A) in two sizes, small 22, 24 or 26, large 28, 30 or 32 inches waist measure. It is adapted to misses as well as to women. It can be bought at any May Manton agency, or will be sent by mail. Address 102 West Thirty-second street, New York, or Masonic Temple, Chicago.

# Vermont Makes Rapid Progress in Agriculture

Farmers Applying Modern Meth- B. D. BLAISDELL ods as Result of Special Exhi- MADE LEADER OF bitions Conducted by Expert BANK ASSOCIATION Employed by Them

**CAMPAIGN ONLY BEGUN** 

Many Other Displays Are to Be Held for the Education of the Producers - School Children Are Interested in the Work

Progress toward expert farming is being made by Vermont farmers through such exhibitions as occurred on the Orcutt farm at Chester on Monday, when Jay Coryell, county adviser, exhibited before 35 farmers and 11 high school boys the uses and mixture of home-made fertilizers for corn and potatoes.

The boys are to write an essay on their observations of the meeting in competition for a prize. The boys are taking the agricultural course at the Chester high school and are expected to become the future farmers of Vermont.

One of the farmers attending the exhibition came 10 miles, and many others drove considerable distances to see the exhibition. Circulars had been distributed announcing the program and the farmers responded with enthusiasm, even though they were obliged to leave their work of planting and cultivation in the busiest time of the year.

The total attendance was 51, including the principal of the high school, two business men, county adviser and the state official cow tester. The farmers had pencil and paper and made notes of the process and amount of ingredients. used in the mixing.

A cow testing association was started with a nucleus of nine farmers and an aggregate of 125 cows. These organizations, of which there are 20 in Vermont, are also being eagerly formed by the farmers, for they realize that they are for their benefit.

### Test 500 Cows

A membership that will give a total of about 500 cows is gathered and ex- and Arthur E. Fitch of the National penses of \$500 contributed. The cow Union Bank, auditor for two years. tester drives around to the various members, stopping a day with each one every month and keeping a record of his work. He weighs the milk from the cows in the morning and at night; also the feed given. At the end of the year he averages the 12 monthly tests and reports to the farmer how much each individual cow has cost to keep and how much it has earned, showing the net profit in each case. Thus the farmer is able to dispose of his poor cows and advance his herd to a higher standard of efficiency.

Orcutt farm H. C. Coleridge, superintendent, brought out the bags of chemicals and poured them out on the 12-foot opera company and Mrs. Berdia C. Huntsquare platform that the farmers might note the color and feeling of the mate-The characteristics of each were

### **EPISCOPALIANS** SAY CLERGY IS NOT BUSINESSLIKE

PORTLAND, Me.-Clergy of the Protestant Episcopal diocese of Maine were limiting the hours of women and minors criticized by the committee on the state the ninety-fourth annual convention of 6 o'clock in the evening, comes up in the diocese in the Cathedral hall Wed-

"As clerical members of the committee we say without fear of contradiction by the laymen that the average clergyman lacks the spirit of business," said the report as presented by the Rev. Frederick Crosby Lee, chairman of the committee in its report which was presented during the course of the morning session. This statement referred particularly to the failure of many of the clergy to report to the committee certain data which are essential to the work of the body.

During the morning deputies were elected to represent the diocese at the session of the general convention, the national body of the Protestant Episcopal church, which will be held in New York city in October in its triennial meeting. At that meeting one of the subjects to receive attention is that of changing the name of the church from Protestant Episcopal to the American Catholic church, also the basis of representation of the respective dioceses. At the present time the basis for all dioceses is four clergymen and four laymen, basis to representation proportionate municants.

UTILITIES REFERENDUM IS URGED PORTLAND, Me.-Kingsbury B. Piper of Augusta was here yesterday attending the annual convention of the grand lodge, Knights of Pythias. # CONNECTICUT ACT

HARTFORD, Conn.-Senators passed the bill containing appropriations for state armories for local national guard mill state tax for this year and next contingents Wednesday afternoon, despite the protests of Senator McDonough the Democratic floor leader, and Senator THIRD PARTY SLATE Johnson of Hartford and one or two others. This was the second time that the subject has taken the lengthy attention of the Senate, for like the national tariff bill, the armory appropriation bill is a local issue. This one carries appropriations of \$175,000 for site and armory in Waterbury, \$125,000 for a site in New Haven, \$12,000 for a site in Bristol, \$60,-000 for both in Middletown, \$50,000 for both in Manchester and \$35,000 to help out on the troop B cavalry armory just over the line in West Hartford.

The first two items were generally faer. Senator McDonough voted for them, warrant.

but he contested the others with which he claimed the bill had been loaded on FOR ARMORY FUND the principle of a vote-getting combination. There were but two or three votes GOES TO HOUSE against any single proposition in the bill, despite the oratory of Senator McDonough and the measure was sent along to the House.

In the House the bill carrying a onewas passed.

# FOR NEW HAVEN

NEW HAVEN-That the intention of the Progressive party this fall is not to confine itself to indorsing the best candidates put up by the Democrats and Republicans, but that it will put a ticket in the field, was announced by Yandell Henderson yesterday in a formal statement.

WASHINGTON-As a result of a pre-Vt., May 14, Representative Greene of Vermont has appointed to qualify for his two vacancies in the naval academy at Annapolis, as principals, William M. Du-Lieut. J. B. Gay, detached navy re- telle of Middlebury and Dennis S. Melvin cruiting station, St. Louis, Mo., to navy of Poultney; as alternates, E. R. Purdy and M. C. Pollard of Rutland and Karl Lieut. J. P. Miller, detached naval Chase and E. H. Shepard of Burlington. The boys will take the entrance examina-

# Lieut. A. B. Cook, detached New York | tion June 5.

MADISON, N. J .- This place is unique in advantages of location and it com prises many charming features attractive to the home seeker. Madison is cated on the Lackawanna railroad with a service of 70 trains per day. fork less than one hour away. But its most advantageous feature of location is being the first town above the "second mountain" of the Watchung range. The air in Madison is as clear and dry as at any point east of the Rockies. The altitude is about 400 feet. Madison is noted for its fine estates. The town has now passed the 5000 population mark and is growing rapidly. Its beautiful public library is on a par with what is usually found in towns many times this size. Its Y. M. C. A. and equipment cost \$75,000. These facts show the character and enterprise of the town. Many beautiful and yet modest houses are now being erected to meet the fast increasing population.

The Equal Suffrage League of Madison, N. J., was organized by Mrs. Lewis D. Bement, its first president, with a membership of nine, which in less than two years has increased to 70, including 15 men. From the first it has been one of the active, vital forces of the town, and has done much for the cause of equal suffrage both at home and abroad. It did good work throughout Morris county for the last bill before the Legislature, it marched in the suffrage parades, it gives suffrage receptions and suffrag picture shows to bring equal rights for women to the popular attention. Two fine, and well attended lectures were given to the public last winter, one by Charlotte Perkins Gilman, the other by Max Eastman. A garden party is planned for June 6, at which the guests of honor will be Mrs. Feickert, president of the State Suffrage Association, and Mrs. Everett Colby, chairman of the state legislative work in New Jersey.

# MUNICIPAL EXHIBIT BRINGS OUT SANTA CRUZ CIVIC ENTERPRISE

Every Department of City Government Represented in Project Planned by Club Women and Made Success by Organizations

LIKE 'SCHOOL OF IDEAS'

ANTA CRUZ, Cal.-The recent muncipal exhibit here added one more to the lengthy list of enterprises for civic betterment in which woman has led the way to success.

The exhibit originated with Mrs. Jerome B. Thomas, chairman of the civic section of the Saturday Afternoon Club, the leading woman's club of the town, under whose direction the club women planned every detail, until every one was at work, from clubs, societies, Y. M. C. A., and press, to musical organizations, artists, and flower lovers; while the naval militia lent their armory and willing hands. Each exhibit was in charge of man or woman eager to explain; members of the Saturday Afternoon Club served as official guides; and the invi-tation to "ask questions" was gladly accepted. Not only were the present accomplishments, needs and hopes of the community shown, but in spoken as well as written words, the faithful work of the past was remembered.

Keynote of Enterprise

Mayor Stone struck the keynote of the whole enterprise when he said, "This is not a show, it is a school of ideas." That the public appreciated the school was shown by the attendance, which grew daily, and aggregated almost one and one half times the population of the city. Every department of the city government trated placards were used largely to "point the moral and adorn the tale" of municipal betterment, past and future. Some had asked doubtfully, what of interest some departments could show. When they had viewed the construction and working of a modern sewer, from the complete section installed-then turned to the meter relentlessly indicating the waste of water and money from a leaking faucet—they were only eager to ask questions of another kind.

Open confession of municipal shortcomings was made none the less telling by a humorous turn. While citizens smiled ruefully over the picture entitled "Bump the Bumps," they appreciated more the many well paved thoroughfares. and viewed with increased interest the fine exhibits of local resources and products for good street construction, and had their municipal pride restored by learning that theirs is the best lighted city in California, aside from the largest

## Public Schools Advanced

The public schools made a fine show ing of advance in methods and accom plishment, often so quietly carried on as to escape general notice. From now or many more will doubtless remember the hearty announcement, "The latch string is always out at the high school for you. Classes in sewing, cooking, wireless telegraphy and carpentry were at work; the exhibit of the school farm will go far to insure the attainment of its aim to serve as local experimental station.

A wealth of the choicest bloom of a street improvement, in library work, in of the enthusiastic work of the civic debeautifying waste places; for roads, for partment.

funds for public enterprises, it has led the way. One of its most notable un-exhibit had interest and value, but, to LAKE CHARLES, La.—The sewerage dertakings was the art and loan exhibit the thoughtful observer, the most valumal opening, through which most substantial aid was given to the furnishing of the new building. Artistic and curious possessions were willingly loaned; a well arranged and quite remarkable collection was the result.

# Improvement Society

The Scabright Improvement Society always has filled a large place in the life of that picturesque suburb. It owns a hall for social purposes; maintained an independent library for years, and has provided the cozy building and lot on which it stands, now conducted by the city as a branch library. Street lighting, a much needed foot bridge, and many an achievement that might have daunted a much larger community, are credited to this society. The Decorative Art So ciety and Woman's Exchange told of good service in helping hundreds of wo men to help themselves. Recently housed in a model building of its own, it is the first woman's exchange to own its home.

Space allotted to parks and playgrounds was used to advantage; showing what Santa Cruz has and does, and what can be done with the support of still further enlightened public opinion-the opinion that is learning, amongst other things, the true value of Jose Vicente de Laveaga's gift to the city, of over 500 acres, in wonderful variety of landscape and beauty.

## Other Activities Helped

Delightful folk dancing by groups of girls daily was just one of the good arguments for more adequate playgrounds. Many practical hints struck a responsive chord—"Help to save the trees along the river"; "In replanting follow nature's DETAIL IN OUTDOOR IMPROVEMENT

WINTER SCENE IN SAN DIEGO, CAL.

(Photo by Lee N. Passmore)

SAN DIEGO, Cal.-This city is awakening to its opportunities and is building hotels and apartment houses to accommodate the tourists who come from the North in the winter months and from the South in the summer. Coronado hotel attained to worldwide note while the city in which it nestled was scarcely known. The U. S. Grant hotel is one of the results of this awakening. The above view is from a photograph made on a winter day, the accompaniments of which are playing fountains, blooming plants and singing birds. It is of the Plaza, showing a busy street scene and the U. S. Grant hotel and Union building.

Delegates Leave City for Home, One Party Going to New Hampshire for Purpose of Organizing a Branch There

### MASS MEETING HELD

Many of the delegates to the national congress of mothers and parent-teacher associations, which has just concluded in Boston, leave today for their homes. One party, including Mrs. Frederic Schoff, national president; Mrs. Orville T. Bright of Chicago, Mrs. Walter Leroy Smith of Malden, Mrs. Milton P. Higgins of Worcester and Mrs. Arthur A. Birney of Washington will take automobiles for Laconia, N. H.

Tomorrow the party will go to Manchester, N. H., to organize a branch in that state of the national congress of

The final session of the congress was held in the Copley-Plaza last evening. It was a mass meeting for teachers and parents and about 1000 were present. Mrs. E. Carlisle Ripley, assistant superintendent of schools, presided. Mrs. Ripley introduced Mrs. Schoff of Philadelphia, who spoke on "The Wayward Child in School.

She urged the teachers to help adapt the school to the needs of the children. She described the aid which parents are giving the teachers in Philadelphia through the Mothers and Parent-Teachers Association. The work of the association, she said, is the education of parents so that they can work with the

Mrs. Smith discussed methods of organizing associations and Mrs. Bright, wife of the assistant superintendent of schools in Chicago, spoke on "Suitable Programs for Parent-Teacher Associations." She advocated the common methods for common problems.

After the addresses Mrs. Ripley introduced several delegates for oneminute talks. She called upon Mrs. George K. Johnson of Philadelphia. president of the Pennsylvania branch; Mrs. Higgins, Massachusetts president; Mrs. Howard W. Lippincott of Philadelphia, chairman of the magazine committee, and Mrs. Edwin R. Weeks of Kansas City, fourth vice president of the association.

### STORE NEWS

Frank Jackson for several years at the ead of the interior decorating department of the Jordan Marsh Company has resigned his position and will return to his former home in England.

A report of the library committee of the Filene Cooperative Association shows an increase of 30 per cent in the number of volumes during the year. The library contains at the present time 889 books. Many of the best magazines of the day as well as the daily papers of the city are found in the racks. During the year approximately 4000 books have been loaned to the employees.

Miss Margaret A. Conway, buyer of furs for the Magrane Houston Company and buyer of wash dresses during the summer, has added to her present duties the charge of the costume department. She succeeds Miss Blanche Patterson. who as previously stated resigned and

Boston buyers who are in New York include Mrs. William H. F. Francis and F. H. Bell of the R. H. White Company. Thomas O'Donnell and F. A. Burdick of the Jordan Marsh Company, Charles Magrane of the Magrane Houston Company, and Ernest W. Dempsey of the Gilchrist Company.

## MR. SALOMON HONOR GUEST

NEW YORK-At a dinner to be given Saturday evening at the Waldorf-Astoria Sidney Salomon will be the guest of honor. He will retire on June 15 from the Fourteenth street store and will become general merchandise manager for Siegel Cooper & Co., of Chicago, succeeding Jacob J. Blumenfeld who has gone to Milwaukee. Leo A. Price of Rothenberg & Co., will assume the management of the Fourteenth street store which has been consolidated with the business of Rothenberg & Co. Prior to his connection with the Fourteenth street store five years ago, Mr. Salomon was merchandise manager for the Simpson Crawford Company, of this city and Schlesinger & Meyer and Carson, Pirie Scott & Co. of

### OYSTER BEDS TO BE INVESTIGATED

NEW YORK-Dr. Carl L. Alsberg chief of the bureau of chemistry, in an address Wednesday night, before the annual convention of the Oyster Growers & Dealers Association of North America, said oyster beds from Cape Cod to Texas are about to be investigated by the department of agriculture.

When polluted beds have been located the department will bar their product from interstate commerce, and, through publicity, aid state and municipal author ities in preventing local sales.

FIFTEEN JAPANESE NATURALIZE SAN FRANCISCO-Of 50 Japanese natives of Honolulu and eligible to American citizenship, only 15 have availed themselves of the opportunity according to the statement of Gilbert D. Metzger, olulu contractor.

Every Argument Is a Smasher for

# Goodrich Tires

Best in the Long Run

Goodrich Tires are an advantage to any car they are on.

The makers of practically half the entire 1913 output of automobiles realized this when they bought Goodrich Tires to equip the cars they are making. You can get Goodrich Tires put on any car you buy or own if you specify them. Goodrich service comprehends so much more than the mere making of tires that you should familiarize your-

There

is nothing

in Goodrich

Advertising

that isn't in

Goodrich Goods

self with it. Goodrich tire users and dealers find Goodrich service stations always ready

to co-operate with them. A Goodrich Route Book, mapping and detailing the tour you plan, will be sent you free-whether you use Goodrich Tires or not.

The Goodrich folders telling how to avoid the common tire injuries will be sent you free, without regard to the tires you use.

Goodrich service in its broadest sense is for the betterment of motoring.

But it is the service that Goodrich Tires themselves give their users which emphasizes the fact that Goodrich Tires are best in the long run.

There never has been a "bad year" with Goodrich Tires. One reason is that there are forty-three years of rubber experience in every one of them. Your dealer will supply you with the Goodrich Tire you need

The Goodrich principle of unit molding was a development of our twentyseven years of experience in rubber manufacturing preceding our making of the first American clincher tiresixteen years ago.

That principle has never needed changing. All Goodrich Tires are made by our unit molded method. Whatever style of Goodrich Tire is best suited for your needs it's the same kind and quality as all other Goodrich Tires. Each Goodrich Tire is molded into a unit. Body and tread are one. The thick, tough tread, being of the tire and not merely put on it, naturally does not slip or peel.

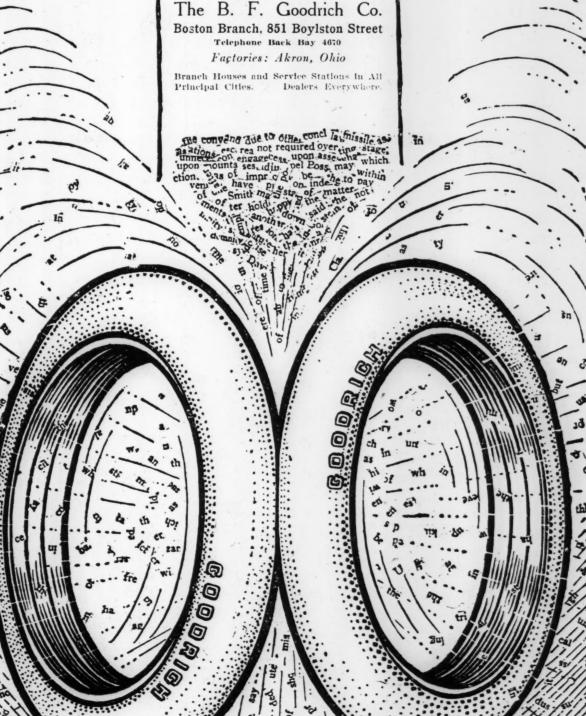

The extra sidestrips of pure rubber reinforce the Goodrich Tire where the strain comes and eliminate the chance of rim injuries.

The whole tire wears uniformly. There are no weak spots or dead places because of over-vulcanizing which cooks the life out of rubber.

Unit-molding - the Goodrich single vulcanization - takes that possibility

Fortify your own judgment with that of the makers of so many of the oldest and best known cars, as well as the enthusiastic recommendation of thousands and thousands of satisfied users, and specify Goodrich Tires for your own car.

Spadework, and it was utterly unreaDiscussing the final question of the sonable of Greece and Servia to delay future relations between Bulgaria and signing the preliminary treaty. Turkey, M. Angelov insisted that, once

sired by Greece and Servia, but the great Turkey would become the best of powers had declared that the decision in friends for the simple reason that so this case rested with them, and this being many of their interests were in common. so Bulgaria could not be expected to conof war whilst Greece and Servia were DAYTON RAISING settling their demands with the great \$2,002,000 FLIND

In reply to the question whether the Bulgarian government had been surprised by the success of their troops, M. Angelov answered "Not at all. For years," he explained, "Bulgaria had been making the necessary preparations, and as a matter of fact the military authorities knew when war broke out that within four or live weeks they could be in Constantinople."

Replying to another question as to whether the Turks would accept the advice of Field Marshal Von der Goltz and create Constantinople a place of arms while fixing their capital at Aleppo or Damaseus, M. Angelov answered that he had no doubt Constantinople would continue as the capital.

"You see," he said, "is is an old city and has been a Turkish city for 500 years. But these are side issues. The important point is that the preliminary SECRETARY LANE treaty should be signed at once in order that the Turks and the allies might proreed to the consideration of the final treaty, which would be called the treaty of London, and which would require the careful examination of nun erous details such as railways, commerce and capitu-

M. Angelov was not anxious to dwell on the differences between Bulgaria and his letter, "the position referred to by flower, known as the drooping hibiscus, Servia but it was evident from his remarks that the idea of the Servian Radicals of a new Slav kingdom in the Balkans does not appeal to Bulgaria.

Bulgaria for Bulgarians and Servia for Servians" was in his opinion the formula which all Bulgaria would adopt but this would not release Servia in any way from abiding by the terms of the treaty

made previous to the war. There is, he continued, of course, a disputed zone about Kumanovo, but this question will have to be settled by the Czar, who has been asked to be arbiter. As for Servia, he went on, you know her troops are as far south as Monastir and Lake Ochrida, but she must eventually withdraw from here. The treaty remains and the terms of it must be com-

M. Angelov remarked, returning to the and would give each the former number question of the great Slav power in the Balkans, are very marked. The Servians are gay and more excitable but they no means so energetic or so rich as the Bulgarians. "Look at the two stamp books, one to contain 96 one cent Ponies in harness and pairs of saddle countries," he said. "Thirty years ago stamps and the other 24 one cent and horses are next. # News of Importance from the Latin-American Centers

# PANAMA CANAL **BUILDING PERIOD**

Workers on Great Project Began in 1853 With Inverted U Type and Wrought Iron Preceded Steel Until 1876

### PROJECTILES DUG UP

(Special to the Monitor)

COLON, C. Z .- Among the relics of former railroad and canal activities on this isthmus is a collection of rails and a number of bombs and grape-shot dug up in the harbor of Cristobal. The rails are in the office of the chairman at Cu lebra.

According to the Canal Record the first track consisted of flat iron bars laid upon stringers, and this was the rail on the section from Aspinwall to Gatun from 1850 to 1852.

### Varied Rail Types

The inverted U rail, shown in the cut as No. 1, weighed 53 pounds to the yard and was the first rail used on the completed railroad, 1853 to 1869. From 1865 to 1879 the 70-pound wrought iron rail. No. 2, was used. From 1876 to 1907 the first steel rail was used. It is shown as No. 3. It weighed 50 pounds.

This wrought iron rail was sold for \$45 per ton and more than enough was realized from its sale to buy new steel rail, which was purchased in England at £6 5s. per ton. No.'s 4 and 5 show the Belgian rail used by the French canal company in construction work from 1882 to 1899. This rail weighed 50 and 60 pounds to the yard. No. 6 is a cross section of the 60-pound steel rail of American manufacture used by the isthmian canal commission from 1905 to the present time, and by the Panama section of the 90-pound American rail placed on curves of the Panama railroad in 1908. In 1910 open-hearth rail with 0.75 carbon was adopted as standard.

The samples are in 12-inch lengths and are mounted with the original fastenings upon a tie taken from the roadbed between Mindi and Gatun in 1912. The tie is of balsamo and was probably laid

In vivid contrast with these vestiges the eastern zone of Peru. is the up-to-date Riehle testing machine ings made at the shops.

## Modern Testing Device

The apparatus is a 100,000-pound, United States standard, vertical, surew-power testing machine, furnished with a complete autographic attachment to record the strain diagrams automatically. Seven speeds are obtainable for the moving part of the testing frame proper, varying from 1-20 of an inch to eight inches per minute, for quick adjustment. Power is supplied by a 220volt direct current motor, so connected and geared that the machine can be started, stopped, changed in speed, or reversed, conveniently and without dan-

ger to any of the mechanism. The testing machine is used in investigating the strength of such materials as wire rope, leather, hose, boiler plate, steel castings, copper alloys, babbitt metals, coke, brick, wood, porcelain, and so forth. Such tests were formerly made with improvised apparatus, and specimens of cast steel and brass were occasionally sent to the testing bureau of the Watertown arsenal, or to the

bureau of standards at Washington. The machine is of especial value in connection with the steel and brass foundries. Specimens from each blow are turned to a standard section and length, screwed into blocks attached to the arms of the machine, and tested for tensile strength and elongation. This obviates the chemical analyses formerly. made for each blow. They are now made only as a monthly check, or to determine the composition of such metals as do not meet the physical requirements. The machine is used occasionally to test materials which have been shipped from the United States without the requisite senting 60 years of effort to build tests, on account of urgent need.

Revenue Growth so Great That After Expenditure of \$33.-000,000 There Will Be Margin of at Least \$23,000,000

### BUDGET PRESENTED

OTTAWA, Ont.-The past week in Parliament was doubly eventful, as not only was the third reading and passage of the naval contribution bill effected, but the presentation of the budget also was unexpectedly included.

The year's financial report shows such revenue expansion that even after an expenditure of more than \$33,000,000 on capital account is provided for there will be a surplus of at least \$23,000,000.

This surplus is to be devoted to re duction of the net debt of the Dominion, and will substantially lessen the amount of interest which annually forms a noticeable item in regular expenditure.

The finance minister, the Hon. W. S. White, referred to this evident progress as being particularly gratifying in view of the very general financial stringency which has been noticeable elsewhere during the year.

The rapid growth of Canada, he said. was indicated by the growth of revenue and expenditure. During the last 10 years the revenue had doubled. Fortunately expenditure had not increased doubled only in comparison with the expenditure of 12 years ago. Thus a surplus had been made possible, and a continuation of this relative balance bebe confidently anticipated. There had ton and Milk streets, tomorrow night. been no curtailment of current expenditure which would account for the large the previous two years was more ac-

BIRD'S-EYE VIEW OF MT. VERNON, WASH. Ovation Accorded King George

MT. VERNON. Wash.-The county seat of Skagit county, Mt. Vernon has a population of approximately 2500, or more than double the number of people it had in 1900. Skagit valley is the richest agricultural and dairying district in the Northwest, and as Mt. Vernon is located on the Skagit river, navigable during the entire year, and also on the coast line of the Great Northern railway, it has rapidly developed into the largest trade center between Bellingham and Everett. Pacific Northwest Traction Company has found it profitable to build an electric interurban line from Bellingham to this place, and is now planning to obtain a larger share of the trade by extending its road to Everett. In place of the lumber and shingle mills formerly found here two large milk condensers have developed. One is the Mt. Vernon Cream Company, an independent factory, and the other is a large branch of the Pacific Coast Condensed Milk Company. Farmers have incorporated and are now constructing an up-to-date creamery and cheese factory. Cabins and rough frame buildings rapidly giving place to substantial brick, concrete and cement structures; streets paved with asphalt, and brick have been substituted for gravel roads. Total length of pavement now about 21/2 miles. A better and more energetic character has been given to Mt. Vernon by the local option law. Fifty per cent of the people are from other lands, although all have the progressive western spirit. Powwow day, the annual harvest festival, is an attractive feature.

and Queen Mary Is Taken as a Good Omen Toward a Better Anglo-German Relation

SCENES ON ARRIVAL

Special Cable to the Monitor from its European, Bureau

LONDON-At noon yesterday King George and Queen Mary arrived in the Kaiser and the Empress, as well as the royal princes, the German ambassador in London, the chancellor of the empire, the foreign secretary and Grand Admiral Von Tirpitz.

The King and the Kaiser drove together to the palace, followed by the Queen and the Empress. The streets were decorated and lined throughout by, regiments of the Berlin garrison, the escort being formed of cuirassiers of the guard.

The welcome in the streets was distinctly warm and prophesied well for the chances of the new relations which both the King and the Kaiser are anxious to assure, and which Prince Lichnowsky, ambassador to England, will be largely instrumental in bringing about. A salute of 101 guns was fired as the King and Queen reached the Schloss and their arrival received a warm welcome of the entire press.

# PITTSBURGH SPENDS FOR BETTERMENT

ment of Municipal Improvements Which Will Cost Sums Aggregating Over \$11,000,000

DITTSBURGH-Municipal improvements aggregating more than \$11,000,000 have been completed in Pittsburgh within the last year, or are in progress of completion, so that the civic betterments resulting from this extensive expenditure will be realized within the next 12 months. Coincident with the work undertaken by the city, private individuals and corporations have been spurred to cooperate in building improvements which will net a total outlay of more than \$20,000,000.

Realizing that the development of the city as an industrial, commercial and residential center required immediate attention to permit its further expansion along these lines, the people several several years ago undertook, through the medium of the present city administration and the various civic and trade organizations, a thorough study of certain broad questions and problems affecting the municipal welfare, with a view of natural advantages of the city as a place of business and residence.

Some of the problems involved in the was made for an economic survey of

For carrying into effect the improvements great expenditures were required. "open." . If they succeed in carrying their a term of years. As a result of investi-

for carrying certain municipal improvements into execution. These improvements included the following: Improvetions; additions to the city home; motor ing main arteries of traffic; the raising duction of grades in a part of the city's business section.

Some of the most important improvements undertaken by the bureau of construction are represented by these sums. Street improvements \$2.374,000, bridges \$2,405,000, sewers \$558,000, total \$5,337. 000; by the bureau of water, filtration improvements \$540,000, pumping stations \$1.818,500, distribution \$3,370,000, total

Democratic Member of Senate Finance Committee Says Legislation Will Be Enacted by Both Branches Before Adjourment

### MR. WEEKS FOR BILL

WASHINGTON-A Democratic memher of the Senate fluance committee is says, but the younger Democratic senabill. He says the Republican leaders have agreed to let the tariff bill pass without a struggle if the Democrats will leave currency legislation off the sumner program, but that they will oppose oth measures to the last if currency egislation is insisted upon.

The purpose of insisting on currency legislation is given as a desire to provide an antidote to the tariff bill. "We need of the average Pittsburgh business man currency reform," he said, "to take care as something phenomenal in the way of of any panic that the opposition may try accomplishment, we did not think that to bring on to discredit the administra-

an inland city would spring forward by tion. A Republican member of the same leaps and bounds to the rank of one of the country's greatest markets. How committee does not concur in these conever, we have been confronted by some- clusions. He says there is no such agreething about Pittsburgh at every turn- ment about permitting the tariff bill to something about the great payrolls here pass. He says nobody can tell whether and the consequent effect of industrial there will be currency legislation this session, and nobody can even speculate The Pittsburgh industrial development with assurance until he knows what the commission has been largely instru-mental in bestirring the energies of the he thinks the Democrats are worried produce men. The commission has aided over the tariff progress and that the adadvertising mediums and advertisers and ministration is introducing currency at has taken expense in so far as this can this stage to distract attention from the be done. It has overlooked no oppor. tariff, because the ones who are most intunity to advertise Pittsburgh products terested in tariff are also most vitally

and distributors, and has prodded along those dealers who are indifferent to the Wednesday on currency reform. He discussed with Senator Kern, the majority leader, the prospects of currency legislain sight as yet as to the advisability of

banking reform. The President carlier had talked with Chairman Cowen of the Senate banking and currency committee and later saw Representative Glass, who will be chairman of the House banking committee. He was merely inquiring into the progress being made by those working on a currency bill. Indications are that within another week a bill will be com-The Massachusetts railway commis- pleted and that its fundamentals will

Senator Weeks of Massachusetts, a member of the committee, says the Rewhich permits agents to work on all publicans will support a good sound curpassenger trains and stations controlled rency bill, and will not make it a party issue, because they realize the need of currency reform as much as anyone else

put the House and Senate Democrats at variance over currency legislation. It is said that Senator Owen, chairman of the banking and currency committee, is anxious that the bill that finally becomes A. members en route to Riverside law shall originate in the Senate and that the Glass bill, to be introduced in The crew dispatches of the eastern the House by Representative Glass,

tials which it is desired shall become

Those in both houses of Congress who have been intimately acquainted with cure laws reforming the present banking system say that the chief obstacle to generally manifested about the subject. Even bankers are not educated in the fundamentals of currency legislation, they say, and it is hopeless to think of educating members of Congress in this in-DURHAM, N. H .- Acting-President E. tricate and involved subject. It is one T. Fairchild has been inducted into office of the most technical and obscure quescollege here. His inauguration was at- which it is almost impossible for Conmore information on currency matters than has ever been secured before, and the findings of that commission were rejected by Congress.

There is general opinion among those members who regard themselves as experts by experience on currency legislation, that there is much in the existing banking system which is good and which should not be discarded, and that whatever is done now to remedy the glaring defects of the system should be in the way of revision and not revolution. The method of issuing currency needs complete overhauling, they say, but that the rest of the system needs slight change.

## VERMONT DAMES ELECT

BENNINGTON, Vt .- The Vermont branch of the National Society of Colonial Dames of America at its annual meeting here vesterday elected Mrs. Bradley S. Smalley of Burlington as honorary president and Mrs. Herry S.

# Fluctuations in Stock Market Very Narrow

# SHORTS COVER AND ADVANCES

After Vibrating Idly During Firs Half of Session Prices Rise Sharply and New York Mar ket Becomes Strong

### LOCALS ARE IMPROVED

Price changes during the early part of today's session of the New York stock market were comparatively small. About the only feature worthy of note at the opening was a drop in National Rail-

This stock has been weak for several days. The petroleum issues which de clined rather abruptly yesterday were in somewhat better demand. Price move ments generally were somewhat mixed and the tone was heavy.

Traders do not see much encourage ment ahead for buying stocks owing to the tightness of the money market. What little buying there is comes from the

Boston Elevated declined to a new low level on the Boston exchange this morning on rather heavy trading. Granby was off a point at the opening.

Toward midday the petroleum issues lost their early gains and dropped well noder last night's closing figures. California Petroleum opened off 1/8 at 373/4. Del & Hudson improved to 38 and then declined to 661/2. Erie... The preferred opened off a point at 67 Erle 1st pf. and declined 3 points further.

Mexican Petroleum opened off 16 at Gen Electric. 83%, advanced to 641/4 and declined a Goldfield Con point. National Railroad of Mexico second preferred off a point at 1934 and decreased the fraction before middles. dropped the fraction before midday.

Union Pacific was off 3, at the opening at 1491, and advanced a point dur- Inspiration ing the first half of the session.

Stocks took a sudden upturn in the May Co ... afternoon. Shorts were forced to cover Mex Petrol. with a rush. Leaders advanced b and gains of two points or more the low level of the forenoon established before the beginning last hour. The local market

C. F. & G. W. Eddy, Inc., of the Boston Chamber of Commerce received the following from their Chicago cor-

Wheat-There were additional bullish crop accounts from the Southwest with contradictions.

Conservative people still believe that a bumper crop will be realized in spite of deteriorating which is said to have occurred recently. Northwestern markets were quite firm. Warmer weather was shown in Canada.

The trade, however, is still indisposed to follow bearish news and in this respect responsive Liverpool cables were virtually ignored today. The demand for cash wheat is being subjected to varied opinions. It is thought that with the sharp spurt in our market prices will place export bids below workable

basis. Domestic milling inquiry is along conservative lines, undoubtedly restricted by the hand to mouth buying of flour consumers, and the brilliant crop pros-

This bank has some features that are not universal among banks

and which are worthy of consideration. It is owned entirely and managed by a few men, who give to it daily attention-yet it never loans to its Directors, nor can it loan more than \$20,000 to any one person or firm. For these reasons it has no attractions for promoting or speculative accounting which must be carried in times of financial trouble. It is independent in fact and spirit. Its affairs and its premises are concentrated, and on that account its Directors can have a more intimate knowledge of all its matters, and its officials can be more available for information and advice, and its statements can be at the better disposal of those who would investigate its policy and credit.

Incoming Orders Not Satisfactory But Hope Is Entertained That Business Will Revive Following New Tariff

### PROFITS ARE SMALL

NEW YORK-Industrial corporations are hopeful that with passage of the Underwood bill consumers will take courage and replenish supplies. New orders are depreciation of the securities of the very unsatisfactory. This was reflected Gross earnings, net earnings, surplus Electric Vehicle Company, a total of in the heavy contraction of Steel Corof securities of United States Motors incoming business was 40 per cent below 8808,400 was charged off, making a loss production forecasts a falling off in steel output within the next several months about 17 per cent on the outstanding unless buyers lay in additional supplies

The feeling in manufacturing circles is not optimistic, but hopeful. Produc-Philadelphia, Chicago, Cleveland, Jersey tion in all lines shows a small decrease City, Newark and Camden, N. J., Lowell, only and orders on hand guarantee nor-

While business is large, and prices in tain classes of goods is small, due to increased costs, largely as a result of

The copper industry is flourishing and producers and selling agencies have experienced no difficulty in obtaining prices representing a wide margin of profit. Certain porphyry companies show a net profit of close to 100 per cent, producing copper at a cost of say 8 cents and selling it for 15%. But it is figured that 10 months of the current fiscal year just a total traffic of around \$103,000,000 for this branch cannot continue firm in published. It is possible by a study of the 12 months. The outlook is now for event of a general recession in busithe figures to reach a fair idea of the ex- a total of approximately \$100,000,000, a ness.

A representative of one large manufacturing concern says he is uncertain as to The April report shows \$7,567,179 The total operating expenses for 10 future course of business, but that a 078 April, 1912, a decrease of \$21,899. \$7,433.435 over the corresponding period year will be obtainable before the latter \$6.016.199, as compared with \$5,169.737, was \$22,800,227, as compared with \$22,- ing the greater part of the summer, but an increase of \$846,462. ### **AUSTRALASIAN** PLAYERS PLAN HARD PRACTISE

Will Have Workouts on Longwood Courts This Week in Preparation for Cup Series

The Australasian lawn tennis players who are in Boston for the week plan to do some hard practise work on the Long wood Cricket Club grounds today in pre paration for the coming matches in the Davis cup series. Captain Doust, Jones and Rice were out at the grounds Wed nesday and did considerable work.

B. C. Wright the former national champion and N. W. Niles also took part in fairly well although they did not apdoubles was the best of the day. The most prominently were their getting ability and the speed with which they sized up the situations they met.

Warm appreciation of the hospitality and courtesy of American sportsmen was expressed by all the members of the team. In an interview with a Monitor representative, the visitors emphasized their indebtedness to the Longwood Club for giving them the opportunity of LONDON-The cricket season proper this easy task was accomplished for the meeting first-class men and thus supplying the hard practise necessary to success in the Davis cup matches early next month.

Mr. Lagden's 142 was a very fine piece "We feel that our chances are improv ing right along," said Captain Doust, "and we are all hopeful of victory. We intend to keep the ball at a low trajectory over the ground and thus mini-American players.

States methods of play Captain Doust cordially admitted the superiority of the 'American service." He said that the American players largely rely on their strong driving to force a victory whereas the Australians try to make and use openings. This comparison of strategy, he pointed out. excepted Beals C. Wright, whom he described as a "wonderful tac-One feature in the Australian At the eighteenth McNamara was well first innings Middlesex made 142, to his high delivery makes some of his balls play that has been remarked on is the while the other is receiving the service.

Although representing Australasia, Zealander, was available. After the Davis cup matches the members of the team will go to England and take part, unofficially, in the all-England single 912 and double championships.

The visitors will continue practising this week, and on Monday and Tuesday will give exhibition games on the Longwood courts.

# **ENGLISH POLO**

HEMPSTEAD, N. Y.-Surprises were in store for the scores of polo enthusiasts who came out to the Piping Rock Club at Locust Valley, L. I., Wednesday to see the pick of England's polo players up for their second practise game with by a score of 10 to 9. Boston took an ton Nationals in the second game of their an American team. The score was: England 5% goals, Piping Rock 41/2 goals. The English team lined up as follows: , Leslie St. G. Cheape; 2, Capt. Noel Edwards; 3, Capt. R. G. Ritson; backs, Capt. Agassiz. And what made the beauty of these places? It would be hard to say exactly, but it was there. There was great simplicity in the furniture, yet entire fitness. Nothing pretended. That was, I am sure, one secret of the beauty of these places. Everything was what it was and no more-as sincere as the morning or the earnest face of a beautiful and sincere woman. Everything was scrupulously clean and there was a sweet order that was as satisfying as is well-harmonized music. There was not a thing too much, and everything counted. In the peasants' cottage was a shelf not far from the window, holding the casement stood two flowering geraniums, their blooms, of a fairly thrilling geranyet there it was, a place of real beauty, Mind. a place to remember, a place in which to rest and be glad, a place of lovely homelikeness and of comfort.

## Modern Knave of Tarts

There have been many prognostications of funny mishaps likely to follow from the airship's conquest of the overhead route. Cattle carried bodily off by a dragging anchor, and banana peels showering from the sky have been motives for many a cartoon. Now, however, what seems to be a bona fide contretemps is reported in an advertisement said to have been found in a daily newspaper. It reads:

"Can any one favor me with the names of the balloonists who, when passing over the village of - last Thursday evening, dropped a bag of ballast down my chimney and com-pletely ruined a fruit tart which I was cooking?"

God's promises are "from everlasting to everlasting" and He always stands up to them.—H. W. Beecher.

### Searching the Scriptures

I did not learn my divinity all at once, but was constrained by my temptations to search deeper and deeper . . . these hunted me into the Bible, wherein I sedulously read and thereby, God be praised, at length attained a true understanding of it .- Martin Luther (Hazlitt tr.)

## First User of Asphalt

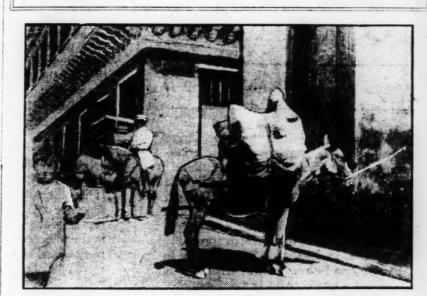

long storm, with the tree-sheltered ! A. E. Aspinwall, in his book "The Brit farm buildings like great ships riding ish West Indies," says that Sir Walter Raleigh was probably the first white man to discover the existence of asphalt in Trinidad. He left England on Feb. 6, 1595, and after coasting by the Grand Canary and touching at Teneriffe, directed his course for Trinidad. He arrived there on March 22d, and cast anchor at "Point Curiapan, which the

Spaniards call Punta de Gallo." After remaining there four or five days the Spaniards Tierra de Brea.

H. Hedge.

### BURRO ON STREET OF HAVANA

Sumner and His Velocipede

James K. Hosmer in "The Last Leaf." gives an interesting glimpse of student life at Harvard in the late '20s. My father, he says, was a proctor, living in an entry of Stoughton hall, for the good order of which he was expected to be responsible. The only man he ever reported was Charles Sumper. The latter was then an undergraduate, and although still a boy, had nearly attained his full stature and weight. He was athletic in his tastes, and given to riding the velocipede of those days, a heavy machine, moved, not by pedals, but by thrusting the feet against the ground. He could keep up with a fast horse in riding into Foston, but at "the cost of a good pair of shoes. Summer carried this machine painfully up the stairs of Stoughton, kept it in his room, and practised on it there, with the result this size and energy being so unusual) that the building, solid as it was, was fairly shaken, to the detriment of plaster and woodwork, and the complete wreck of the proper quiet of the place.

e visited a place called Parico, and THOSE who have seen fair Sevilla may From thence I rowed to another port. well wonder whether this is not percalled by the naturals Piche, and by haps a corner of some bright-walled street of that Spanish city. Praise to the Poets

A striking viewpoint of the arts as set

forth by a famous English poet is seen

in the lines entitled "Poets Are Great-

Only a few the life stream's shore

With safe unwandering feet explore;

Then from its brimming waves their

Untired its movement bright attend,

Follow its windings to the end.

And its deep-toned, melodious voice

They speak! The happiness divine

They feel runs o'er in every line;

No painter yet hath such a way,

Nor no musician made, as they,

And gather'd on immortal knolls

Beethoven, Raphael, cannot reach

Such lovely flowers for cheering souls.

The charm which Homer, Shakespeare,

To these, to these, their thankful race

Gives, then, the first, the fairest place;

And brightest is their glory's sheen,

For greatest hath their labor been.

Its spell is round them like a shower-

**ADDRESS** 

Allison V. Stewart

Falmouth and St. Paul Sts. BOSTON, MASS.

If the application of the federal system to the 48 United States has alone saved those states from militarism (and this is admitted) writes Moreton Frewen to the New York Post, we should be careful not to appear to ignore the incomparable service to peace by Washington and Hamilton, and in doing so turn the page on the several experiments which for now 100 years and in two hemispheres have been uniformly successful.

Benefits Credited to Federation

Today the nations are in urgent need of some principle of government which may protect them from two forms of economic waste: (1) vast military expenditures, (2) a parasitic bureaucracy.

# CHILDREN'S DEPARTMENT

# Nest in a Cactus

In northern Mexico there is a species | they at last got home again! of woodpecker that often makes its nest in the stalk of one of the large cactuses, the giant cereus, according to the Youths Companion. Undismayed by the spines that cover the trunk, the bird clears a space, and with enormous labor, digs a short tunnel and a flask-shaped avity in the tough fibrous wood.

## Circus in Central Park

Central park, New York, seems as if it would be a very good place to play circus in. The mounted policemen make their splendid horses dance and curvet and do all kinds of circus-like things. The other day one of the mounted policemen of the park saw a strange sight. He rubbed his eyes and looked again. Was there a circus procession coming down one of the bridle paths? It looked so. After a moment, however, he saw that it was only a country nag with a big bundle of hay strapped to her back. On the horse three jolly boys also found room to cling. They had come in from the country to have a look at New York

city. Altogether the young explorers must have had a gay time. What wonders they had to tell the other boys when

China Would Stand Against Opium THE appeal recently issued by the China Republican to the Shanghai municipal council, in regard to the sale and consumption of opium in the international settlement, is one that makes a just claim on attention. China, there can be no doubt of it, is making a struggle against a great national evil with a courage and determination which probably has no parallel in history. That she is in carnest there can be no doubt. That she is

rapidly accomplishing her purpose there can equally be no doubt, but that she is receiving all the encouragement, both moral and active that she has a right to expect from western civilization, is gravely open to question.

Instead of Shanghai being a model for the rest of China, instead of the great treaty port placing itself definitely in the van of progress in regard to this matter, it would appear that opium selling and smoking flourishes in the international settlement to such an extent that distinct encouragement is afforded to opium smokers to come to Shanghai from those centers from which the evil has been banished. This is very far from being as it should be, and indeed amounts to a simple reversal of what common sense and justice has a right to expect. The opium question has been discussed ad nauseam. To the average man it has been plain for years past, that to force opium on China when she did not want it, on the basis of a trading right was the last infirmity of national hypocrisy, but authority has lagged sadly behind popular conviction.

The steady pressure of an intelligent public opinion has, it is true, gradually compelled a more enlightened policy, but there is still a call at every turn for watchfulness. The present position in Shanghai is an instance of this. At this moment, when the far east, as represented by the young Chinese republic, is turning to the west for guidance in forming its destiny, it argues a singular lack of foresight, to put it on no higher basis, that the civilized powers should thus acquiesce in what amounts to a negation of the principle to which they have pledged themselves. There is need of immediate action. At the present moment it is a distinctly unworthy thought that the municipal council of a great international settlement like Shanghai should need to be appealed to, to do within its borders what China in the teeth of the most active opposition is doing throughout her vast territory.

Women as School Trustees The Nova Scotia Legislature has under consideration at present a bill enabling women to become school trustees, and this fact has called out an expression of favorable opinion in a quarter representative of conservative opinion in Quebec. Judging from newspaper comment in other parts of the Dominion this acceptance and indorsement of progressivism has come rather unexpectedly, but none the less pleasingly, to the liberal ele-

ment. La Patrie is a French Canadian newspaper of considerable prominence and influence in the province last named, and usually it views with disfavor all radical tendencies. Touching the proposed Nova Scotian legislation for the enlargement of woman's opportunities and responsibilities, however, it is unreserved in its indorsement.

In Montreal, it points out, the administration of the schools is in the hands of a commission of nine members, but in all the municipalities of the province under the general school law, school boards are composed of five members. These bodies have almost absolute control of elementary and secondary education. It is their duty to provide for the needs of both girls' and boys' schools. They are composed of men exclusively. Inspection of schools throughout the province is also in the hands of men. La Patrie holds that in school boards of five members at least one woman should be included. It reasons that, while the four men remaining would be able to do the work of five, the one woman would be able to do as much useful work as her four colleagues together, and it adds: "In the domain of primary education the counsels of women are often better than those of men." Women, it holds, have more time to look into details of school management, especially where girls are concerned, and, the paper holds, "the absence of women in the management of girls' schools is an anomaly that nothing can justify.'

This anomaly has only recently, as times goes, been discountenanced in other parts of the continent, and even in some of the most pretentiously progressive quarters anomalies with reference to woman's part in education still exist. It is to be hoped that the projected Nova Scotia legislation will be successfully carried through, and that not only all the provinces of the Dominion, but all the states of the Union, will continue to open the way for woman's useful counsels in school and other public affairs.

Assistant
Secretary
Roosevelt's
Visit Fruitful

Assistant Secretary of the Navy Roosevelt, in his visit to Boston, succeeded in leaving a distinct impression that he will favor making the navy yard here of greater use and importance and that the navy department will move in that direction. This was an incident to his coming, which had another purpose; but here seems to be a case where incident loomed larger than the plan. The

object of the visit was mainly to hear the representatives of the laborers in the yard who had filed a protest against the efficiency system that they apprehended was to be more fully put in force. The navy department has been besought by the advocates of some of the most extreme of theories as to shop management to adopt the Taylor system, which is regarded by many as the last word in the reduction of the worker to the importance of a cog in the machine.

So the system has been resisted by the practical men in charge of the construction and repairs work, who appreciate the value of having workmen who are intelligent and capable of justifying a trust in their skill and their faithfulness. It is only in slight degree that the efficiency and economy design has been employed, but, at that, the workmen were able to point to a repair job of a labor cost of 10 cents as having been done at a planning cost of \$1.90. The men wanted to make sure that a system that would supply such instances should not be established. They were practically assured that by the already demonstrated opposition of the chief officers at the yard, and the assistant secretary gave them the comfort of the knowledge that the present administration of the department is likewise content to regard the naval workers as citizens and conscious creatures.

As for the incident, the future of the Boston navy yard is brightened by the official visit even to the extent of the hope that this yard will become the central manufacturing plant for the navy. It is quickly recognized by Secretary Roosevelt that the conditions here are all favorable to a great extension of the construction and repair work. He finds that the government is buying machinery and equipment that it could manufacture to advantage and that the navy yards might be supplied with a steadiness of employment that would help more to efficiency than any possible theory of management. The Boston yard had its advantages shown him and his response indicated that he looked for its development into a shipbuilding and machine-making center of great consequence. The activity of the local congressmen in this direction is to be credited with having opened the way to the large value of the yard to the country and to the neighborhood.

Better

Late Than

Never

An APPEAL for concerted action by stock-holders in the New York, New Haven & Hartford Railroad Company has been issued by a committee of which former Secretary of the Navy Meyer is chairman and the Hon. Richard Olney legal adviser. Investors are asked to cooperate in an investigation of the policy of the present management of the road as to how far it is responsible for present low walkers.

values of stock and how far its policy of expansion is defensible and therefore deserving of indorsement. The implication is that full knowledge of all facts to which stockholders have been entitled has not been sought by them hitherto. Consequently now the board of directors is to be called upon for light that, under any reasonable interpretation of stockholders' rights as investors, always has been at the disposal of the latter if demanded. So long as income from investments continued to be satisfactory and the stock of the road and of its subdivisions was rated well in State street, the management was free from inquisition from

There is a parable in this latest incident in a controversy that is arousing New England as no other contemporary issue. It sheds light on conditions that are national and not sectional. Had the ever-increasing host of persons in the United States whose income in whole or in part is derived from receipt of dividends lived up to their obvious duties, moral and legal, during the past generation of amazing growth of the corporation form of business, the national record for governmental prosecution of persons alleged guilty of unlawful, monopolistic practises would have been different. Directors have seldom had reason to believe that investors have been as keen in enforcing an ethical standard of corporate management as they have been in expecting dividends. From this the natural assumption often has been that price of abstention by the stockholder from any disquieting inquisition as to methods has been his receipt of his dividend semi-annually.

However unfair such an assumption may be in connection with the attitude of many investors who put right above all else, it has had its basis in far too much of recent American financiering to be ignored by preachers of a higher code of business ethics. In the New Haven instance of corporation management, this present more of the stockholders is to be welcomed, if for no higher reason than that it is "better late than never." It represents the coming into the field of investigation and of advisory recommendations of a body of persons whose verdict, when recorded, cannot but have a powerful effect on such internal adjustments of the corporation's management as time may make necessary.

Wisdom an Urban Asset

the investors' quarter.

THE CITY of Kansas City, Mo., has had a superintendent of schools for thirty-nine years, with the same man as originator, shaper and perfector of the local system. Monclair, N. J., is an eastern community with much the same record. Contrasted with the ferment, unrest and brief tenure characteristic of educational administration in far too many communities records like these are luminous with sense and with efficiency. For

given a growing man and a growing community, why forever be discounting all that special knowledge of traditions, local conditions and community hopes which can only come with stability and durability of tenure? Why insist that technical knowledge in some new phase of pedagogics is a better asset in a superintendent and is worth more than the wisdom derived from life and accumulated within the local field? Wise are those towns and cities that having found a consistently progressive and wise superintendent of schools attach him and use him during a working career, and then—as at Kansas City in the case of Mr. Greenwood—continue to pay him to serve in the role of a specialist adviser on problems in the local field where his unique accumulation of knowledge and of wisdom will be serviceable.

Such treatment of veterans dignifies the calling of educator, and discloses the community that is thus minded as both grateful and sagacious. Thirty-nine years of consecrated service invested in education of the youth of a community in its formative stage is about as noble a record of life labor as a man can make. To fail to appraise it so would subject a community to the charge of ingratitude. Suddenly and summarily to cease using the wisdom accessible after such a career would be wasteful of the most precious fruit of living.

IN PHILADELPHIA several women have been appointed street cleaning inspectors, and it has been found thus far that they perform their tasks not only faithfully, but efficiently. This simply confirms the experience of other municipalities that in the employment of women have been in advance of Philadelphia.

The educational council of Northwestern University, Evanston, Ill., has ordered that after July 1 next a single shall be substituted for the double "m" in "mamma." This has long been the rule in many schools. But the elimination of useless double consonants should not end here.

REGRETFUL attention has been called from time to time to the tendency throughout the United States toward sameness, and joyous encouragement has been given from time to time to every appearance of a revolt from the all-pervading monotony. The planning of cities, their architecture, their parks, their shop fronts, their vehicles, the clothing of their people, all tell the same story. It is only fair to say, however, that what is true of the United States is true of Canada is true

of the United States is true of Canada, is true, practically, of all the larger countries, and particularly so of all modern cities. Unfortunately it is coming to be equally true of towns and villages.

Until recently there has been a latent hope in the bosom of lovers of local color that people everywhere would, at least, not fall into the habit of eating the same kind of things cooked in the same way. Alas, it looks as if this hope were going to be blighted. In our household department the other day was printed a list of dishes prepared by Dakota women for a contemporary. Naturally, the lover of local color hastened to run it over, but only to find that out in the Dakotas the ladies are cooking such things as light biscuits, doughnuts and tomato curry, and offering to their guests such delicacies as ice cream, peanut cakes and cookies.

Dakotas to find any of these, that one does not have to go to the Dakotas to find any of these, that one does not have to live in the Dakotas in order to have to eat any of them. There is absolutely nothing racy of the Dakota soil in doughnuts or cookies, or light biscuits or tomato curry, or ice cream, flat or coned. And here is where the lover of local color is disappointed. When Dakota women send in recipes, one naturally anticipates something to eat with the ring of Bismarck, or Grand Forks, or Fargo in it, or with the atmosphere of Huron, Mitchell or Sioux Falls falling in graceful drapery around it. But no. What one gets is precisely what one might expect to get from California, Texas, Michigan, Pennsylvania or New Hampshire.

They were better days when the different parts of the country had different and distinctive dishes, no matter how humble they were—when one knew where to travel to find ham and hominy, corn pone, slapjacks, turned-over eggs with bacon, codfish balls, fried chicken, porterhouse steak, blueberry pie, apple sauce, turkey with cranberries, baked beans, each in its highest expression and most appetizing form—the days when a popular chorus ran—

She was bread in old Kentucky.
She was cake in New Orleans,
In Chicago she was bacon
And in Boston she was beans.

But the leveling process has destroyed distinctions here as almost everywhere else, and the women of the Dakotas are not to be criticized because they have failed to forward recipes with a local flavor. The whole country is eating the same dishes, and prices are higher now than they used to be when one could confidently look for something different on the table at every stopping place along the road.

OFFICIALS of Williams College, Williamstown, Mass., a village gorgeously set among the Berkshire hills, announce a plan for making the town a university extension center during the months when undergraduates absent themselves. Fully to utilize the \$2,000,000 "plant," to give the local faculty advantages now inaccessible, and to provide a charming environment for professors and advanced students who wish to take univer-

Williams College Summer School Dishes from

the Various

States

sity courses during the summer months, a high-grade summer school is to be tried, providing alumni or others furnish funds for the experiment. As comports with Williams traditions, especial emphasis is to be put upon humanistic studies. International as well as national resources are to be drawn upon in selection of vital, inspiring personalities for teachers.

The notion that summer was not a closed season for the scholar first found a resolute and capable champion among first-class educators in the first president of Chicago University, William R. Harper. His experience at Chautauqua, N. Y., had converted him from any prior skepticism, which he may have had, and when he came into power at Chicago, he at once defined university work in terms of a schedule that was operative the year round.

Now summer schools exist in connection with most of the eastern and western universities, and in some cases the work done counts for degrees. It has remained for President Garfield and the trustees of Williams College to show faith in the adaptability of the scheme to a typical American small college. They deserve backing sufficient to give the plan a test. For them, however, nature has been wondrous kind. The landscape dominated by Greylock is not one that many colleges can duplicate.

IF, AS WASHINGTON intimates, the assistant secretary of the United States department of labor is to be Louis F. Post, and if the commissioner-general of immigration is to be Anthony Caminetti, then the administration is about to give additional proof of its willingness to find its agents among radicals. Mr. Post is one of the most conspicuous champions of the "single tax" that the countered the beautiful The Public which

Significant Appointees

try has, and he has made The Public which he edits in Chicago, a force counting for democracy and for ethics applied to government and to industry. Mr. Caminetti is an Italian from the large colony of that people who have come to share prominently in the social evolution of California. He has specialized in study of social problems and will come to the task of immigration control and supervision with a somewhat different perspective from that of some of his predecessors.

The point to be noted in connection with these appointments is that each man has been selected because of his proven intellectual interest in the field of government where he will operate. Neither

With the Pacific coast states anticipating and preparing for a marked influx of Europeans when the Panama canal opens, it is quite proper that a Pacific coast man should be at the helm to aid in every way a desirable division of the stream of migration that so long has cast an unfair burden of assimilation upon the Atlantic coast cities.

It seems a trifle odd, after so much truth has been told about the horrors of war, that people who ordinarily are thoughtful should find anything amusing in the hope for universal peace.
